

## Technical data sheet AVEMA ODP-NC

### Organic N-fertilizer 12 – 0 - 0

Using collagen (art. 10 cat. 3 EG-VO 1069/2009 and according to DüMV annex 2 table 7.2.1 )

	Unit	Value
Total nitrogen (N)	[%]	12
Total phosphate(P2O5)	[%]	0
Total potassium oxide (K2O)	[%]	0
Organic substance	[%]	89,2 i.t.dm. Contains a lot of organic matter
PH value		5,6
Humidity upon delivery	[%]	15 ± 5
C/N ratio		3,6

#### Manufacturer

BADER Polska Sp. z o.o.

#### Status August 2024

FiBL listed and approved for organic farming according to EU organic legislation

Exam standard	Restriction	Validity date
EU organic legislation	-	31.01.2025
Equipment list Germany	-	31.01.2025
Ecovin Germany	-	31.01.2025
Naturland Germany	-	31.01.2025

### N-Mineralisierung AVEMA ODP - NC

## Technical data sheet AVEMA ODP-NC

### Raw material

100 % collagen as an animal by-product

### General information on storage and use

The product should be stored in the original packaging in a cool, dry place away from light. AVEMA ODP-NC pellets have a shelf life of at least 12 months from the delivery date. After opening the original packaging, the net mass may decrease or increase due to moisture. After being introduced into the ground and watered, the AVEMA ODP-NC automatically creates its ideal state of action. During storage, transport and application, precautions should be taken to avoid ingestion by livestock. It is not allowed to mix the fertilizer with animal feed. In order to have an ideal effect, the fertilizer should be slightly worked into the soil after application. After application, the green areas should be well watered. After fertilization, animals must be denied access for at least 21 days after application.

### Storage and application instructions for use and fertilization in the house and small garden area

Instructions for use: Green areas, ornamental lawns, sports lawns etc. water sufficiently after application and ideally work the pellets into the soil. It is not allowed to mix the fertilizer with animal feed.

## Description

AVEMA ODP-NC is an organic fertilizer pellet made from organic natural fibres. It promotes soil life and is tried and tested in plant, vegetable and fruit cultivation. AVEMA ODP-NC is ideal for short cultivation periods. Added to this is the exceptional moisture-regulating interaction of AVEMA ODP-NC pellets. With its remarkable moisture regulation, the pellet can store many times its own weight in water. Thanks to its structure and fiber composition, ODP-NC improves the soil properties and loosens it up. Due to their size, the pellets are well suited for manual spreading and for small and medium throwing distances. In addition, AVEMA ODP-NC can be applied as a depot, providing the crop with a continuous, long-lasting source of nitrogen. The AVEMA ODP-NC pellet is produced using a special process free of polymer layers, additives or pelleting aids.
